What we do?

Our community is based on the idea of sharpening the problem solving skills of our members while promoting the sharing and collaboration with peers and experts. This is possible thanks to a dedicated platform including:

- **A knowledge center**:
  A collaborative hub with educational material and tools.

- An **experts'** corner:
  A dedicated place with best practices, content and advice from specialists.

- **A discussion area**:
  A set of tools allowing interaction and collaboration between members.

How to join?

The only thing you need to do to join this community, is to share our values:

Community is open to all and free. Our force lies on the willingness of our members to exchange, share and disseminate knowledge and best practices.

If you share these values in the way we do, then you are from now on part of this Community of Practice. Welcome !

To start taking advantage and improve your exposure within this community, you can start by one of following actions:

- Sharing a first document in our **"Documentation Center"**
- Adding the Community to your contacts in **"Linked In"**
- Joining the Community group in **"Linked In"**
- Sharing a first tool in our **"Tools Center"**
- Comment in our **"Forums"** / **"Experts' Blogs"**

Want to become a recognized Expert?

If you want to commit with the development of this community while increasing your exposure, become part of our recognized experts in our "Panel of Experts"

Being an expert means to truly engage to the community. You will be at the heart of it and you will contribute regularly with us through a long term relationship.

Here are some examples of contributions you can make to become an expert:

- Creation of a blog into the Experts' Corner.
- Significant and regular participation in the Knowledge Center.
- Leading/animating technical forums to promote members interaction.
- Participation into the Polls and Surveys section by providing key questions and comments.
- Provision of regular feeds and news to the community.
- Any other idea that fits with the community' spirit and principles.

Want to know more?

If you want to know more about what we do and how you can be part of it, or if you would like to be added into our registers so that you will benefit from our mailings/newsletters, please do not hesitate to "Contact us"
